The farm is run by an association offering therapeutic, educational, cultural and/or training mediation using animals.

Continue on the tarmac road, which climbs for 400 meters. At the intersection, at the sign "La Barre de la Vigotte 20 min n°21", if you wish, you can make a round trip to the top of the hill (house n° 4285) to admire the view over the Remiremont basin.

To continue the walk, take the unmarked track on the right for 100 meters, then descend the dirt track on the right for 200 meters. You'll pass by a farm, with a view of the ponds below.

DID YOU KNOW THAT?

The watershed line

The start of the route follows the ridge marked with milestones which is located on the watershed line : in fact, a drop of rain which runs down the Ruppian slope of the mountain ends its course in the North Sea via the Moselle and the Rhin while a drop of rain which runs down the opposite slope arrives in the Mediterranean Sea via the Saône and the Rhône.

OUR IMPRESSION

“This short walk is ideal to discover the heights of Rupt-sur-Moselle, just a stone's throw from the Plateau des Mille Étangs and the verdant Remiremont region, dominated by the Massif du Fossard.”
